Rate card & information

one of the 'greenest' magazines on the island

The unique, UV generation of Lithographic printing is only available at Mailmate in the Channel Islands. The ultraviolet light instant drying and curing reduces the ink usage by 20% and eliminates the use of harmful chemicals. Organic ingredients including Soy and Vegetable oil are used in the production of the inks Mailmate use.

The process is Eco friendly and reduces CO² emissions. This ground breaking printing is greener for our environment. Mailmate has balanced through World Land Trust the equivalent of 2,277kg of carbon dioxide, this will allow the Trust to protect 1,594m² of critically threatened rain forest.

ALL of the printing materials come from sustainable resources and use little or no chemicals in their production. ALL of the printing materials are 100% biodegradable and recyclable.
